

ABOUT WENGFU AUSTRALIA

Wengfu is ranked 7th in the world for production of finished phosphate fertiliser. The combination of the company's rock reserves and supply capacity is unmatched in the Australian market.

As manufacturers of over 5 million tonnes of finished fertiliser and related products each year Wengfu is a growing force in the international fertiliser market, exporting fertiliser, DCP, phosphoric acid and other phosphate-based products to over twenty countries worldwide. Wengfu group has been supplying phosphate products to the Australian market for over 15 years.

Now established in Australia, we market agricultural fertilisers from storage facilities in Queensland, NSW, South Australia and Victoria through a network of established dealers and fertiliser retailers. Our skilled team has many years of local experience and is well versed in the Australian market.

We offer a fresh approach that focuses on quality products, consistency of supply, value-for-money and a fair deal relationship with our clients.

Wengfu Australia has the products to help you grow and prosper.
